Your role

- Planning, execution and reporting of R&D and GLP studies as study director
- Project Management of external cooperation
- Development and validation of bioanalytical methods and routine sample analysis for preclinical and clinical studies
- Data interpretation and reporting of results (e.g. validation reports, study reports)
- Communication with external partners and stakeholders
- Leading a team of scientists and research associates
- Managing GLP laboratory including writing of SOPs, test instructions and GLP reports
- Support contract preparation and drafting budget

Your profile

- Scientific education (minimum requirement: Master degree)
- Excellent expertise in bioanalytical methods of immunology, molecular biology and cell biology.
- Work experience in the pharmaceutical industry (> 3 years)
- Strong skills in leadership and project management
- Profound knowledge of GLP principles
- Excellent English skills (oral and written), proficiency in German is of advantage
- Excellent Software skills (MS Office)
- Excellent communication and organization skills, team-oriented personality

You are dedicated, with strong organisational skills and a willingness to learn. A professional demeanour and respect for colleagues are very important to us. We expect our people to work efficiently with a strong focus on achieving targets, and to adopt an entrepreneurial, strategic approach.

What is important to us

Pioneering, international and respectful: we see collaboration between academia, service providers and students as a creative process that paves the way for the successful transformation of research findings into commercial applications.

Your salary

IMC University of Applied Sciences Krems is not subject to any collective agreements. The minimum gross salary for this position is EUR 3.000,-- per months based on a full-time workload (40 hours per week). Allocation to pay grades is based on qualifications and professional experience. The university is prepared to pay a higher salary in recognition of relevant professional experience and qualifications.
